2012 MT GOV IT CONFERENCE

Better Business. Better Technology. Better Government.

Microsoft Pre-Conference Agenda
Monday December 3rd, 2012
Must be registered to attend

08:30 – 10:20 Microsoft Enterprise Vision & Roadmap
Overview of everything current and coming across all Microsoft enterprise Technologies including some future vision from Microsoft R&D.

10:30 – 11:20 Windows Server 2012
How to save money with the new OS features and save time with automation – including what's new in the Core OS, AD, Dynamic Access, Security etc… as well as Hyper-V 3.0, Live Migration without a SAN, Hyper-V Switch, Fiber Channel, and more

11:30 – 12:20 Systems Center 2012 Server Components
One Product with 7 components: See how other SLG customers are leveraging their investment.
· Orchestrator saved 19,000 hours with automation in 1 year (9 FTE equivalant)
· Operations Manager provides deep application health monitoring and alerting / Network Management
· Service Manager self-service portal for, Windows 8 upgrades & Private Cloud
· Configuration Manager: Compliance for Servers, SOX, GBLA, etc.

1:30 – 2:20 Windows 8
Go beyond the new Start Screen and see the enterprise features like Windows ToGo, BitLocker, Direct Access, etc., then come back around to the user interface changes and discover what's great about touch as well as the improvements for keyboard and mouse users

2:30 – 3:20 Systems Center 2012 Desktop Components
· See how Configuration Manager can help you do things like: manage your desktops (even when they are outside the firewall); keep machines compliant with regulations via Desired Configuration Management (DCM); deploy new operating systems and virtual applications; and more
· Explore how Service Manager can automate your helpdesk and allow more self-service features for your end users.

3:30 – 4:30 Mobile Device Management
Discover the extent of what you can manage via ActiveSync in Configuration Manager as well as hear about some of enhanced capabilities coming soon in, inTune.
